EDUCATION

Ha Noi university of science and technology

10/2018 - Present

Marjors : Software Engineering

GPA : 3.19/4

SUMMARY

Currently a final year student at the Ha Noi university of science and technology. Passionate about code and technology, always learning and discovering new technology. Trying to do my best and I want to be an IT expert.

PROJECT

Chat App

08/2021 - 11/2021

- Project Description: Build a chat application for web and mobile platform. Users can send messages (text, html, image, video, file, sticker) in addition to other functions such as pin, reply, create vote, forwarding messages. Create and manage chat groups, a chat group also has many channels, it helps us when we need to talk about a certain topic without fear of messages drifting. Besides, users can also manage friends.

- Team size : 3.

- Technologies: NodeJS, Redis, Socket IO, MongoDB, ReactJS, Redux, React Native, AWS (EC2, S3), Jenkins.

- Responsibilities: Responsible for the Front-end of the website. Design UI of web, analysis and design of components, get API from BE and execute the functions in module chat (send, pin, reply, vote, share message), module friend (manage friends), module conversation (manage conversation).

- **English Learning Website (tienganhpro.xyz)**

06/2021 - 08/2021

- Project Description: Building a website to help users learn English online, users can look up vocabulary, learn vocabulary by topics, take notes of vocabulary and review those words, learn English through videos, view grammar blogs, online toEIC test and get score and explanations after submitting. In addition, the administrator can manage test sets, exam questions, vocabulary, vocabulary packages, blog posts.

- Team size : 3.

- Technologies: Spring Boot, NodeJS, MySQL, MongoDB, ReactJS, Redux.

- Responsibilities: Responsible for the Front-end of the website. Design UI of web, analysis and design of components of modules : online test, learn through video, get API from BE and execute the functions in module online test (select question follow parts, handle test time limit, submit test, get result and score), module learn through video (select video follow topics, get transcript and vocabulary of video and execute action on that).

SKILLS

Programming Languages Javascript.

Frameworks & Platforms ReactJS, Redux.

Lib UI Ant Design.

Other HTML, CSS, SCSS, Github, read understand English, teamwork.
